**Universitätsklinikum
 Regensburg**

**The Regensburg University Hospital
 and the above-named patient hereby agree a
 Special Options Contract
 on the provision of separately billable special options
 in keeping with the general contract conditions (AVB)
 and the standard charge scale.**

The following special options have been agreed (check as applicable):

- The services of all doctors of the hospital involved in the treatment, if these doctors themselves (**private doctors**) or the hospital are entitled to charge for their services separately, including the services of any outside doctors or medical facilities on whom they may call (**private medical care**). Charges follow the currently valid version of the standard charging scale for doctors or dentists.
- Treatment in a 1-bed room with comfort services € 158,00/day
- Treatment in a 2-bed room with comfort services € 78,00/day
- Accommodation and full board for an accompanying person without medical necessity. € 45,00/day plus VAT

Should the private doctor be unavailable for **unforeseen** reasons, the patient agrees to be treated by his or her regular substitute.

The patient hereby agrees to all data necessary for billing purposes being passed to an external billing agency.

Notes:

1. The separately billable special options agreed between the hospital or, in the case optional medical care, private doctors and the patient, will be provided within the limits of the available personnel and material resources, in such a way that the general work of the hospital is not disturbed.
2. The hospital or, in the case optional medical care, private doctors can refuse special options to patients who have not paid the costs of a previous hospital treatment, or paid these after their due date.
3. The hospital or the private doctors can temporarily suspend provision of special options without notice whenever and for as long as this is necessary to ensure the provision of general hospital care to other patients; the patient can cancel the agreement at any time, the agreement terminating at the end of the day following cancellation; either party can cancel the agreement without notice for good cause.
4. The hospital and the private doctors can require appropriate advance payments or part payments.

5. Transfer of costs:

The costs of special options are not covered by German statutory health insurance policies (gesetzliche Krankenversicherung). Patients receiving special options are direct-payers, and obliged to cover the costs themselves. Patients are advised to ascertain in advance if these costs are covered by a private medical insurance, by an employer (Beihilfe) or by any other agency.

6. In the case of separately billable care by private doctors, it is not possible to contract the care of only one private doctor (§ 17 KHEntgG). An agreement about separately billable medical care extends to all the doctors of the hospital involved in the care of the patient who are entitled to charge separately for in-patient, out-patient, pre-admission or postdischarge treatment (§ 115a SGB V), including services by doctors and medical institutions outside the hospital which are arranged by them. This applies also if the hospital itself charges for treatment by a private doctor.

7. Disclaimer of liability in case of separately billable care by private doctors:

In the case of separately billable care by private doctors, the hospital is contractually obliged only to provide accommodation, meals and nursing services. Only those doctors entitled to charge for their services separately are party to the special options contract. The hospital accepts no liability either in contract or in tort for mistakes by private doctors. The private doctor is personally responsible for providing the services to which he or she has agreed, and he or she alone is liable. This applies also to mistakes made by auxiliaries (for example subordinate doctors or doctors consulted for a second opinion) whom he or she may call upon. The hospital has liability for those medical services for which it itself charges.
