Universitätsklinikum
Regensburg

Elective Services Agreement

between Regensburg University Hospital and the aforementioned patient regarding the provision of elective services according to the

General Contractual Terms and Conditions and the conditions in the Tariff

The patient requests the medical services of all doctors employed at the clinic who are involved in the treatment, in as far as these doctors themselves or the clinic are entitled to separately charge for their services, including services arranged by these doctors from doctors or medically managed facilities outside the clinic (**elective medical services**). Payment is made based on the valid schedule of fees for doctors/schedule of fees for dentists (GOÄ/GOZ).

In the event that the doctor of choice in the respective department is **unexpectedly** unable to attend, the patient agrees to the permanent medical representative taking over their duties:

Specialist department/Doctor of choice	Permanent medical representative	Functional area

Polyclinic for Dental Prosthetics Prof. Dr. Sebastian Hahnel	PD Dr. Angelika Rauch	

The patient agrees that data required for billing can be transferred to an external billing office.

Notes:

- The elective service agreement covers the entire treatment cause even if this is interrupted.
- The separately chargeable elective services agreed between the clinic and the patient are provided based on the personnel and resources available at the hospital provided that general hospital services are not affected.
- The clinic can refuse to conclude an elective service agreement with a patient who has not paid for a previous hospital treatment or has paid for this late.
- The clinic may temporarily stop providing elective services to the extent and for as long as this becomes necessary to provide general hospital services to other patients; In addition, the agreement can be terminated by the patient on any day by the end of the following day; the agreement can be terminated by either party without notice for good cause.
- If elective services are agreed, the clinic can request appropriate advance deposits as well as appropriate payments on account.
- When using the elective "medical services" service, the choice cannot be limited to individual doctors at the clinic who are authorised to charge (§ 17 para. 3 KHEntgG). An agreement regarding elective medical services covers all doctors employed by the clinic involved in the patient's treatment, in as far as they are entitled to separately calculate their services within the framework of full-time inpatient, ward-equivalent, day-inpatient and part-time inpatient treatment as well as pre- and post-inpatient treatment (§ 115a of the Fifth Book of the Social Security Code), including the services provided by these doctors and medically managed facilities outside the clinic. This also applies if the clinic charges for the elective medical services itself.
- The separately chargeable medical services are, even if they are charged for by the clinic, provided by the doctor of choice from the specialist department or the medically managed facilities personally or under the supervision of the doctor of choice based on special instructions from a doctor from the department or institute (§ 4 Paragraph 2 S. 1 GOÄ/GOZ) or by the responsible medical representative (§ 4 para. 2 p. 3 GOÄ/GOZ). The performance of services under the supervision of the doctor of one's choice can also be carried out by non-medical staff (e.g. non-medical therapies in the fields of psychiatry, psychotherapy and psychosomatics).

There is no statutory health insurance coverage for the use of the elective services mentioned above. When using elective services, the patient is obliged to cover the costs as a self-payer. Please check whether your private health insurance/aid or your statutory health insurance via a special optional tariff according to § 53 of the German Social Security Code covers these costs.
