Program

2nd Bavarian-Bohemian AO Symposium
„Around the Ankle“
June 29–30, 2012
Regensburg, Germany
Invitation

Dear Colleagues,

the Department of Trauma Surgery of the University of Regensburg is proud to invite you to this year’s AO symposium taking place in our beautiful city of Regensburg. The Bavarian-Bohemian friendship has a long tradition and it is our honor to keep it scientifically spirited. Last year our dear colleague Prof. MUDr. Koudela invited to an excellent symposium in the beautiful city of Pilsen, which was a great success. Now we’re happy to hold the 2nd Bavarian-Bohemian symposium and hope to continue a tradition of regional cross-border symposiums.

The topic of the 2nd Bavarian-Bohemian Symposium will be “Around the Ankle”. We had the chance to acquire some of the European top-class lecturers to talk about acute injuries and post-traumatic conditions of the foot. The complexity of the foot requires grand expertise, an exact knowledge on anatomical conditions and a sophisticated consideration of every diagnostic tool. But the physicians experience is essential when it comes to a decision-making process.

We will get a close insight in modern treatment principles and paths to an accurate indication. An special highlight is the live operation with live comments and possible discussions with the surgeon will be presented. Furthermore interesting case discussions will deliver new perspectives.

We are looking forward to host you in our beautiful historic city of Regensburg and inspiring scientific lectures and discussions to pursue the tradition of Bavarian-Bohemian cross-border symposiums.

Faculty
The faculty for this course is composed of international and regional surgeons.
Evaluation guidelines
All AOTrauma courses apply the same evaluation process, either ARS (audience response system) or paper and pencil questionnaires. This will help AOTrauma to ensure that we continue to meet your training needs. In some regions, CME accreditation is dependent on the participant’s evaluation results.

Intellectual property
Course materials, presentations, and case studies are the intellectual property of the course faculty. All rights are reserved.

Recording, photographing, or copying of lectures, practical exercises, case discussions, or any course materials is absolutely forbidden.
